This action is in response to applicants' amendment of 2 November 2007. The amendments to the claims have overcome the art rejections, the objections to the claims and the 35 USC 112 rejections. The amendments to the specification have overcome the objections with respect to "alkali earth" and "neutralizing". Applicant's arguments with respect to "rubber-base" and how the process reduces the content of chlorine have been fully considered and are persuasive. Thus these objections have been withdrawn.

Claims 6 and 7 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claims contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventors, at the time the application was filed, had possession of the claimed invention.

The claims include new matter and thus fail to meet the 35 USC 112 written description requirement. The specification teaches the annealing step gives the ferrite powder a pH of 10-12. The claimed range of "not less than 10" includes pH values greater than 12 and thus is new matter. The only teach of the chlorine content after the annealing step is found in example 1 and is 0.055 wt%. This single point does not support the claimed range of "0.055 wt% or more". Thus this range is new matter.

Claims 6 and 7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

These claims refer to "the last ferrite magnetic powder". It is unclear what is meant by this. The specification does not refer to a last ferrite powder. The claimed and disclosed process

treats and an aqueous dispersion of the only ferrite powder with sulfur acid so as to form a ferrite with a pH of less than 6 and a chlorine content of 0.05 wt% or less and would not produce a “last ferrite powder”.

Claims 4 and 5 are allowable over the cited art of record for the reasons given in the previous action.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
